## Language

- English
- Hindi

## Certifications

- ReactJS & Redux - Great Learning
- DSA & MERN Stack Development - Cuvette
- Frontend developer

## Hobby

- Cricket
- Learn New things

## Projects

### AI website builder platform

- Built a platform for creating website using the MERN stack, Cloud AI API including features for user can create the single page of website and host IT.
- Technology - React, node, express, mysql, framer-motion, tailwind, openAI API, javascript

### Story Sharing Web App

- Built a platform for sharing stories using the MERN stack, including features for user registration, story creation, and content management.
- Technology - React, node, express, mongodb, framer-motion, module css,
- Link:** <https://swip-tory-six.vercel.app/>

### Job Listing Web App

- Designed a job listing application using React.js and Node.js, featuring real-time job postings and a dynamic user interface.
- Technology - React, node, express, mongodb, module css, javascript
- Link:** <https://660e47a68d457fa29bba3ddc--meek-starburst-dc1ff.netlify.app/>

### E-commerce Web App

- Implemented a full-featured e-commerce application with product listings, cart management, and checkout functionality using React.js and Firebase add payment also.
- Technology - React, node, express, mongodb, stripe-payment-gateway, firebase, javascript, bootstrap
- Link:** <https://65dcca3e9b6a8806754a8780--beautiful-pixie-3874.netlify.app/>

### Quizzes Web App

- Developed an interactive quiz platform with features for creating and managing quizzes, utilizing React.js and MongoDB for data storage.
- Technology - React, node, express, mongodb, module css,
- Link:** <https://quize-nine.vercel.app/>

### Invest-o-Meter

- Developed a homepage for connecting startups and small businesses with potential investors, incorporating light and dark mode toggling and responsive navigation using Animate.css.
- Technology - html, css, js, mysql

### Quick Search Chrome Extension

- The problem it solves: Tired of opening multiple tabs just to make quick searches? This extension lets you search without leaving your current tab, making browsing more efficient and organized.
- Technology - html, css, js

## Practice Projects

- Notes Web App - <https://sunny-meerkat-f42a14.netlify.app/>
- Rock Scissor Paper Game - <https://ajay7906.github.io/rockScissorPaper/>
- Fashion E-commerce Web App - <https://front-ecom-eight.vercel.app/>
- Dark Mode Chrome Extension - <https://github.com/ajay7906/darkwebexten>
- Online Voting System

## Internship

- Exon Saha

## Currently Exploring

- GraphQL
- Docker
- AWS
